SUMMARY

MCA candidate and full-stack developer experienced with React/TypeScript, Vite, Supabase, and Flutter/Firebase. Shipped end-to-end projects including a farm-to-table marketplace with Stripe payments, a rental marketplace with Supabase Realtime chat and TOTP 2FA, and a cross-platform wellness app with ML-Kit food scanning. Seeking SDE/Frontend roles starting 2026.

SKILLS

Languages: C++, JavaScript, TypeScript, Dart, SQL

Frontend: React, Flutter, Vite, Tailwind CSS, shadcn/ui, HTML5, CSS3

State Management: Provider, Bloc, TanStack Query, React Hook Form, Zod

Backend & Databases: Node.js, Supabase, Firebase, PostgreSQL, Firestore, SQLite, REST APIs

Tools & Testing: Git, GitHub Actions, Vercel, Stripe, Google Maps API, Google ML Kit, Vitest, Playwright, Postman, Android Studio

EXPERIENCE

Tech Hangout — Flutter Front-End Developer Intern

June 2023 – November 2023

- Shipped 6+ user-facing screens for an internal Flutter application, integrating RESTful APIs with Provider and Bloc state management.
- Built reusable custom widgets and animations that standardized the app's visual language across modules and improved navigation flow.
- Collaborated with a senior developer in daily stand-ups and code reviews, contributing to a shared component library reused across the team.

Tech: Flutter, Dart, RESTful APIs, Provider, Bloc

PROJECTS

Krishisetu — Farm-to-Table Marketplace (Live)

Apr 2026 – Present

- Built a full-stack farm-to-consumer marketplace with separate Farmer and Customer dashboards, role-based product CRUD, persistent cart, and order tracking.
- Engineered a real-payments flow using Stripe Embedded Checkout backed by Supabase Edge Functions (Deno) with webhook-driven order confirmation, gated by PostgreSQL Row-Level Security.
- Integrated Google Maps with haversine-distance lookup for nearby-farmer discovery, multi-language i18n, and dark mode; shipped with Vitest + Playwright and GitHub Actions CI.

Tech: React 18, TypeScript, Vite, Tailwind, shadcn/ui, Supabase (Postgres, Auth, Edge Functions, RLS), Stripe, Google Maps API | **Live:** krishisetu-phi.vercel.app

VeraLeap — Rental Verification Marketplace (Live)

Mar – Apr 2026

- Built a full-stack rental marketplace with four role-based dashboards (Tenant, Owner, Broker, Admin) covering listings, visit scheduling, favorites, reviews, and an admin verification queue.
- Engineered security-first architecture with PostgreSQL Row-Level Security on every table, mandatory TOTP-based 2FA for brokers, and a `has_role()` SQL gate for admin actions.
- Integrated Supabase Realtime for tenant-broker chat, Sentry for error tracking, and PostHog for analytics; achieved Lighthouse 95+ with Vitest + Playwright in GitHub Actions CI.

Tech: React 18, TypeScript, Vite, Tailwind, shadcn/ui, Supabase (Postgres, Auth, Realtime, Edge Functions, RLS), TanStack Query, Zod | **Live:** veraleap.vercel.app

Nutrify — Cross-Platform Nutrition & Wellness App (Live Web + APK)

Feb – Apr 2026

- Built a Flutter app spanning food/calorie/macro/micronutrient tracking, BMI & TDEE calculators, weight, sleep, fasting, steps, and workouts — running from one codebase on Android, iOS, and Web.
- Engineered a dual-pipeline food scanner combining `mobile_scanner` (barcodes) with Google ML Kit Text Recognition (nutrition-label OCR) over a shared camera feed, with post-processing into macro/micro fields.
- Wired Firebase across 5 surfaces (Auth, Firestore, Storage, Cloud Messaging, security rules), offline-first sync via `shared_preferences` ↔ Firestore, BLE wearable integration with reconnect tolerance, and timezone-aware local notifications.

Tech: Flutter, Dart, Firebase (Auth, Firestore, Storage, Cloud Messaging), Google ML Kit, `mobile_scanner`, `flutter_blue_plus`, Provider, `fl_chart` | **Live:** nutrify-52ebf.web.app

CERTIFICATES

- Meta Front-End Developer Professional Certificate** — Coursera / Meta · July 2025
- The Complete Flutter Development Bootcamp with Dart** — Udemy · May 2024
- Object Oriented Programming using C++** · August 2024

EDUCATION

Lovely Professional University — Masters of Computer Applications | CGPA: 6.06

Aug 2024 – Present

Relevant Coursework: DSA, OOP, DBMS, Operating Systems, Web Development, Software Engineering.

CT Group of Institutions — Bachelor of Computer Applications | CGPA: 7.20

July 2021 – July 2024

JN International School — Intermediate (Class XII) | 76%

April 2019 – March 2020
